### **Lighted Ice Sculpture Tray**

The acrylic tray needs to be placed on top of the lighted base. The drain of the tray is to be lined up with the side of the base that fits down inside and sits level.

Attach tubing over tapered center nipple of the drain fitting located at one end of the acrylic tray.

Drain accumulating water into another container, which may be stored under the table (out of sight). We recommend a large bucket.

Plug in lighted tray and flip switch to turn light on.
